PROFESSIONAL PROFILE

Game designer specialized in gameplay mechanics, economies, reward loops and game feel, with additional experience in production and coordination of multidisciplinary teams. I have taken part in the release of two games and have led the design and production of three independent projects, from scope definition and prototyping to playtesting and delivery. I work with Unreal Engine, Unity, and production, documentation and version control tools.

PROFESSIONAL EXPERIENCE

Game designer and producer | Wild Alchemists | Hot Potato
Unreal Engine 5 | PC/Steam | Madrid | Sept 2023 - Present | Hot Potato: Tag Out on Steam

- Led the design and production of Hot Potato, a premium multiplayer party brawler developed for PC and Steam, currently in Beta.
- Coordinated the design, art and development areas, setting scope, milestones, priorities and production schedule for a team of 9 people
- Designed and iterated on the core game feel mechanic through cycles of prototyping and testing.
  - Traversal movement was improved
  - The feel of the gameplay was improved
- Wrote and maintained the GDD, technical documentation and production plans using an in-house app

Lead designer and freelance producer | Legends of Learning | Fossil Records
Unity WebGL | Educational science game for students aged 9 to 12, United Kingdom and USA | January 2026 - September 2026

- Directed the design of a game to teach the fossil record and the principle of superposition to Year 6 students
- Designed the core loop so the experience can be completed in a single class session (20 minutes)
- Coordinated the team, defined scope, milestones and development schedule for a multidisciplinary team of 4 people.

Lead designer and freelance producer | Legends of Learning | Block City
Construct 3 Educational city builder for students aged 8 to 10 September 2024– June 2025 | Block City by Pilar MPR

Game design intern | Mechanic games
Unity | January 2023 - June 2023 | Published

- Crea tu propio monstruo (Create Your Own Monster) | Design of minigames with distinct mechanics, balancing, level design and documentation for the team. April - June 2023
  - Crea tu propio monstruo - Apps on Google Play
- Healthy Jeart | Design of items and power-ups for an educational game about healthy eating, balancing, testing, challenges, rewards and UI mockups in Adobe XD. January-March 2023
  - Healthy Jeart - Apps on Google Play
